Super + Alt + I	Step backward through monitor scaling options
Alt + Tab	Cycle forward through windows on the active workspace
Alt + Shift + Tab	Cycle backward through windows on the active workspace
Ctrl + Alt + Tab	Cycle focus forward through monitors
Ctrl + Alt + Shift + Tab	Cycle focus backwards through monitors

System controls	
Super + Ctrl + A	Audio panel
Super + Ctrl + B	Bluetooth panel
Super + Ctrl + W	Wifi/network panel
Super + Ctrl + D	Display panel
Super + Ctrl + P	Power panel
Super + Ctrl + Alt + D	Calendar panel
Super + Ctrl + 1-9	Toggle bar panel by position
Super + Ctrl + S	Share menu (via LocalSend)
Super + Ctrl + T	Activity (btop)
Super + Ctrl + C	Capture controls (screenshot/-recording/picker)
Super + Ctrl + O	Toggle menu
Super + Ctrl + H	Hardware menu
Super + Ctrl + Q	Calculator
Super + Ctrl + E	Emoji picker
Super + Ctrl + .	Transcode media
Super + Shift + Ctrl + A	Pick an AI agent

Adjustments	
Shift + Brightness Up	Maximum screen brightness
Shift + Brightness Down	Minimum screen brightness
Alt + Brightness Up/Down	Precise 1% brightness changes
Alt + Volume Up/Down	Precise 1% volume changes
Keyboard Brightness Up/Down	Keyboard backlight brighter/dimmer
Keyboard Backlight	Cycle the keyboard backlight levels
Alt + Play	Next track
Alt + Shift + Play	Previous track

Launching apps	
Change/add bindings in ~/.config/hypr/bindings.lua.	
Super + Return	Terminal
Super + Alt + Return	Tmux terminal
Super + Ctrl + Return	Herdr (agent manager)
Super + Shift + Return	Browser
Super + Shift + Alt + B	Browser (private/incognito)
Super + Shift + F	File manager
Super + Shift + Alt + F	File manager in cwd of terminal
Super + Shift + M	Music (Spotify)
Super + Shift + Alt + M	Music (cliamp)
Super + Shift + I	Password manager (1password)
Super + Shift + N	Editor (Neovim)
Super + Shift + C	Calendar (HEY)
Super + Shift + E	Email (HEY)
Super + Shift + Alt + E	New email (HEY)
Super + Shift + A	AI (ChatGPT)
Super + Shift + Alt + A	AI (Grok)
Super + Shift + G	Messenger (Signal)
Super + Shift + P	Google Photos
Super + Shift + S	Google Maps
Super + Shift + Alt + G	Messenger (WhatsApp)
Super + Shift + Ctrl + G	Messenger (Google)
Super + Shift + D	Docker (LazyDocker)
Super + Shift + O	Obsidian
Super + Shift + W	Writing (Omawrite)
Super + Shift + X	X
Super + Shift + Alt + X	X Compose
Super + Shift + Y	YouTube

Universal clipboard	
Usually on Linux, you need Ctrl + Shift + C/V to copy'n'paste in the terminal and Ctrl + C/V to do it everywhere else. These Omarchy unified clipboard hotkeys work everywhere.	
Super + C	Copy
Super + X	Cut (not in terminal)
Super + V	Paste
Super + Ctrl + V	Clipboard manager

Capture	
With screenrecordings, the hotkey first asks which audio you want, then starts recording. Hit it again to stop. See screenshots and recording for the details.	
All capture options are also accessible under Trigger > Capture in the Omarchy menu (Super + Space).	
Super + Ctrl + C	Capture menu (for keyboards w/o PrintScr button)
Print Screen	Screenshot
Alt + Print Screen	Screenrecord
Super + Print Screen	Color picker
Super + Ctrl + Print Screen	Text extraction to clipboard
Super + Alt + [	Make webcam overlay smaller while recording
Super + Alt +]	Make webcam overlay larger while recording
Alt + Shift + L	Copy current URL from webapp or Chromium
Alt + Shift + D	Download the video on the current page to ~/Videos
Super + Ctrl + X	Start/stop dictation (requires Install > AI > Dictation)
F9	Push-to-talk dictation (requires Install > AI > Dictation)

Notifications	
Super + ,	Dismiss latest notification
Super + Shift + ,	Dismiss all notifications
Super + Ctrl + ,	Toggle silencing notifications
Super + Alt + ,	Invoke most recent notification
Super + Shift + Alt + ,	Open notification history

Style

Extra background images live in `~/config/omarchy/backgrounds/<theme name>`. Also available via `Install > Style > Background` in the Omarchy menu.

All style options are also accessible under `Style` in the Omarchy menu (`Super + Space`).

Super + Ctrl + Shift + Space	Pick a new theme
Super + Ctrl + Space	Pick theme background
Super + Backspace	Toggle transparency on a window
Super + Ctrl + Backspace	Toggle single-window square aspect

Toggles

Super + Ctrl + I	Toggle locking on idle
Super + Ctrl + N	Toggle nightlight display temperature
Super + Ctrl + Delete	Toggle laptop display on/off
Super + Ctrl + Alt + Delete	Toggle laptop display mirroring
Super + Shift + Space	Toggle the top bar
Shift + Mute	Switch to next audio output
Shift + Play	Switch to next media source
Super + Shift + Backspace	Toggle window gaps

Reminders

Super + Ctrl + R	Set a reminder
Super + Ctrl + Alt + R	See all reminders
Super + Ctrl + Shift + R	Clear all reminders

Notices

Super + Ctrl + Alt + T	Show time as notification
Super + Ctrl + Alt + B	Show battery as notification
Super + Ctrl + Alt + W	Toggle weather as notification

Tmux

The prefix key is `Ctrl + Space` (`Ctrl + B` also works). You can change these bindings in `~/config/tmux/tmux.conf`.

Panes

Prefix + v	Split pane beside (vertical)
Prefix + h	Split pane below (horizontal)
Prefix + x	Kill pane
Prefix + z	Toggle pane zoom (fullscreen)
Alt + Enter	Split pane below (no prefix)
Alt + Shift + Enter	Split pane beside (no prefix)
Alt + Escape	Kill pane (no prefix)
Ctrl + Alt + Arrows	Move between panes
Ctrl + Alt + Shift + Arrows	Resize panes

Windows

Prefix + c	New window
Prefix + k	Kill window
Prefix + r	Rename window
Alt + 1-9	Go to specific window
Alt + Arrow Left/Right	Move between windows
Alt + Shift + Arrow Left/Right	Move window left/right

Sessions

Prefix + C	New session
Prefix + K	Kill session
Prefix + R	Rename session
Prefix + N	Next session
Prefix + P	Previous session
Alt + Arrow Up/Down	Move between sessions
Prefix + s	List sessions
Prefix + d	Detach from session

Copy mode (vi-style)

Prefix + [	Enter copy mode
v	Begin selection (in copy mode)
y	Copy selection (in copy mode)

General

Prefix + q	Reload config
Prefix + ?	Show Tmux keybindings
Prefix + :	Command prompt

Tmux layout functions

These functions must be run inside a Tmux session.

tdl <ai> [<second_ai>]	Create dev layout with editor, AI, and terminal
tdlm <ai> [<second_ai>]	Create dev layout per subdirectory
tsl <count> <command>	Create multi-pane swarm layout

Ghostty Terminal

Ghostty terminal is installed using `Install > Terminal` via the Omarchy menu.

Ctrl + Shift + E	New split below
Ctrl + Shift + O	New split besides
Ctrl + Alt + Arrows	Move between splits
Super + Ctrl + Shift + Arrows	Resize split by 10 lines
Super + Ctrl + Shift + Alt + Arrows	Resize split by 100 lines
Ctrl + Shift + T	New tab
Ctrl + Shift + Arrows	Move between tabs
Alt + Numbers	Go to specific tab
Shift + Pg Up/Down	Scroll the history
Ctrl + Left mouse	Open link in browser

File Manager

Ctrl + L	Go to path
Space	Preview file (arrows navigate)
Backspace	Go back one folder

Navigation

Space	Show command options
Space Space	Open file via fuzzy search
Space E	Toggle sidebar
Space G G	Show git controls
Space S G	Search file content
Ctrl + W W	Jump between sidebar and editor
Ctrl + Left/right arrow	Change size of sidebar
Shift + H	Go to left file tab
Shift + L	Go to right file tab
Space B D	Close file tab

While in sidebar

See all the Neovim hotkeys configured by LazyVim.

A	Add new file in parent dir
Shift + A	Add new subdir in parent dir
D	Delete highlighted file/dir
M	Move highlighted file/dir
R	Rename highlighted file/dir
?	Show help for all commands

Quick Emojis

You can use `Super + Ctrl + E` to show a complete emoji picker that'll put the selection on the clipboard or you can use these quick access options.

CapsLock M S	smile
CapsLock M C	cry
CapsLock M L	love
CapsLock M V	victory
CapsLock M H	heart
CapsLock M Y	yes
CapsLock M N	no
CapsLock M F	fuck
CapsLock M W	wish
CapsLock M R	rock
CapsLock M K	kiss
CapsLock M E	eyeroll
CapsLock M I	wink
CapsLock M P	pray
CapsLock M D	drool
CapsLock M M	money
CapsLock M X	xellebrate
CapsLock M 1	100%
CapsLock M T	toast
CapsLock M O	ok
CapsLock M G	greeting
CapsLock M A	arm
CapsLock M B	blowing

Quick Completions

You can add more of your own by editing `~/XCompose`, then running `omarchy-restart-xcompose` in the terminal to get the changes picked up.

CapsLock Space Space	- (mdash)
CapsLock Space N	Your name (as entered on setup)
CapsLock Space E	Your email (as entered on setup)
